A DESCRIPTIVE LIST

COLUMBIA UNIVERSITY LIBRARIES

## PREFACE

THIS descriptive list of manuscript collections in the Columbia University Libraries has been intermittently in the process of compilation for more than six years. Various members of the staff of the Department of Special Collections have contributed substantial time to its production. Much of the basic work was done by Mr. Edward C. Lathem (now Assistant Librarian at Dartmouth College) and Mr. J. Terry Bender (now Chief of the Division of Special Collections at Stanford University), who served as special assistants in the Department while completing their courses in Columbia's School of Library Service. More recently Mr. Kenneth Lohf, working closely with Miss Alice Bonnell, both of whom are officers in the Department of Special Collections, has brought the listing to completion and has readied it for the printer. It reaches publication at this time due directly to the wholehearted interest and encouragement of John A. Krout, Vice President of the University, and Richard H. Logsdon, Director of the Libraries.

Columbia owns nearly three hundred homogeneous collections of manuscripts, with the number increasing constantly. Of these, 235 are administered by the Department of Special Collections, Columbia's principal repository for manuscripts and rare books, while 59 are to be found in various other library divisions: 17 are in the Avery Library; 33 are in Columbiana; 5 are in the East Asian Library; 1 is in the Law Library; and 3 are in the Medical Library. These collections have come to Columbia by gift, bequest, and purchase, and they vary in size from a few pieces to many thousands. They have at least one characteristic in common, in that each collection has a central theme which makes it a unit. Several thousand miscellaneous, unrelated letters and documents, individually acquired, are not included in this listing; information regarding them can be obtained through our card catalogs or by correspondence.

The descriptions include: name of collection; type of manu-

script (papers, letters, notes); dates covered; size of collection in number of pieces, if known, or number of boxes; location, if other than the Department of Special Collections; description of contents; source, if other than purchase; and long-term use restrictions, if any. The order of listing is alphabetic by the name of the person, family, agency, or other corporate body about which the particular collection centers. Occasionally a collection has been listed under its subject or the name of its collector when such procedure seemed most suitable. Collections of materials other than actual manuscripts—newspaper clippings or photocopy of various kinds, for example,—have seldom been included; however, when such material forms *part* of a collection, mention of it has been made in the descriptive notes.

The index is limited to subject references. Citations of individual letters and manuscripts are available through the card files or special listings in the library divisions containing the collections.

In most cases, the manuscript collections are open for scholarly research. Long-term restrictions placed upon certain collections by their donors have been noted in the descriptions; short-term restrictions limiting the use of particular pieces or groups of material to specific research projects in progress or in contemplation have *not* been so noted.

Scholars from other institutions are urged to write in advance of their visits, stating their purposes, qualifications, and references. It should be borne in mind that the hours of opening in the various library divisions are not necessarily uniform. Enquiries as to the availability of specific items will be answered promptly, and the hours of such availability will be stated on request.

Manuscript materials are of course not available for inter-library loan, but microfilms or other photocopy can be prepared at standard charges, providing this does not violate stated restrictions or interfere with existing research projects, *and*

*providing the condition of the originals will permit such photocopying.* In case of questions arising from these contingencies, the decision of the Director of the Columbia University Libraries shall be final. Photocopy, unless clearly specified otherwise, is "for reference use only," and in every instance permission to publish must be obtained in writing from the Director of the Libraries prior to such publication.
